Observer Signature:	
Notary Signature & Seal:	· · · · · · · · · · · · · · · · · · ·
	be recorded hourly in an open area away from any overhangs. The

Measurements taken at a remote site must be recorded hourly in an open area away from any overhangs. The rain gauge must be calibrated to measure accumulation to the nearest hundredth of an inch and should have a measuring capacity of at least 5 inches. The gauge should be level and sufficiently secure against a blowing wind. The observer must be with the equipment for the duration of the insured hours.

Please email a copy of completed report to William.Clarke@Beazley.Com, originals accompanied by a description and photograph of the instrumentation device used for recording.
